### Strategy: Rainbow Facts, Pairs to 10

Rainbow Facts or Pairs to 10 are best learnt with a ten frame. Using counters to show the number and another set of counters (or the missing counters) to show the matching pair is an excellent way to help students visualise these facts.

This ten frame shows 6 + 4 using only one set of counters. A second set of counters can be used if preferred to establish this useful set of facts.

Use this ten frame with counters to complete the questions below.

A rainbow is a bright and cheerful illustration of the pairs that add to equal 10.

# Addition - Number Fact Families E

## Strategy: Rainbow Facts, Pairs to 10

Each Rainbow fact has a related family of facts: "Addition" and its "Turn Around", "Subtraction" and its "Turn Around".

+	0	1	2	3	4	5	6	7	8	9	10
0	0	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10	11
2	2	3	4	5	6	7	8	9	10	11	12
3	3	4	5	6	7	8	9	10	11	12	13

6	6										
7	7										
8	8										
9	9	1									
10	10										

Look at the addition grid on the left. Highlight all the 10s in the answers. Then look at each pair of numbers that add to make that 10.

### E.g. Addition: Count On 3, Turn Around

1)  $6 + 4 = \underline{\quad}$       2)  $4 + 6 = \underline{\quad}$

### Subtraction: Count Back 3, Difference Of 3

3)  $10 - 6 = \underline{\quad}$       4)  $10 - 4 = \underline{\quad}$
