- 100) $7 - 4 =$ _____

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Addition & Subtraction Revision Worksheets". Plus 0 and plus 10 facts are SPECIAL CASES. The number zero is the "additive/subtractive identity", meaning that another number is unchanged by the action of adding/taking zero. Adding ten to a single digit number results in the associated teen number which has one ten and the single digit number of ones; most pairs of a single digit number and the associated teen number sound similar (eg, "six" and "sixteen"). This can be illustrated easily with a pair of ten frames.
