Information for Parents: "Double" Strategy

x2 - "Double" Strategy

Relate these number facts to the "Double" addition facts. Use ten frames to help students visualise the process.

Double 7 - Students can see 7 made up of 5 + 2; double that equals 14. Other representations can be shown with the counters on the ten frames.

Information for Parents: "Place Value" Strategy

x10 - "Place Value" Strategy
 6 ones multiplied by 10 become 6 tens, or 60. Most tens groups are easy to match with the ones names, apart from "twenty", "thirty" and "fifty", so spend more time on these numbers.

Information for Parents: "5 is Half of 10" Strategy

x5 - "5 is Half of 10" Strategy

THINK: 5 is half to 10 so multiply by 10 and halve it.
 Even multiples of 5 are equal to half the number of tens -
 $5 \times 6 = 10 \times 3 = 30$
 Odd multiples always end in 5 and are 5 more than the
 previous multiple
 5×7 think: $5 \times 6 = 30$ so $5 \times 7 = 35$

THINK: $5 \times 6 = 30$ (3 tens, half of 60)
 $5 \times 7 = 35$
