+8 "Near Ten" Strategy with Ten Frames

Plus 8 number facts are taught using a NEAR TEN strategy: encourage students to think of adding ten, and then subtracting two. The plus 8 strategy is easily illustrated using two ten frames and counters. Place 8 counters on the left-hand ten frame, the other number in the right-hand ten frame. The student should easily see that moving two counters from the right to the left makes the sum a simple "ten plus ones" question.

$10 + 6 = 16$
 $8 + 6 = 16 - 2$ or 14
