This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Addition & Subtraction Revision Worksheets".

The recommended teaching sequence is shown in the bar at the top of this sheet. Plus 8 number facts are taught using a NEAR TEN strategy: encourage students to think of adding ten, then subtracting two. Minus 8 facts are similar, encourage students to think of taking ten, then adding two. The difference of 8 requires students to think of taking the ones from the teen number, then taking two more. Ten frames are excellent for explaining these facts.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Addition & Subtraction Revision Worksheets".

The recommended teaching sequence is shown in the bar at the top of this sheet. Plus 8 number facts are taught using a NEAR TEN strategy: encourage students to think of adding ten, then subtracting two. Minus 8 facts are similar, encourage students to think of taking ten, then adding two. The difference of 8 requires students to think of taking the ones from the teen number, then taking two more. Ten frames are excellent for explaining these facts.

| 85) $6 + 5 = 11$ | 90) $7 + 6 = 13$ | 95) $5 + 9 = 14$ | 100) $4 + 4 = 8$ |

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Addition & Subtraction Revision Worksheets".

The recommended teaching sequence is shown in the bar at the top of this sheet. Plus 8 number facts are taught using a NEAR TEN strategy: encourage students to think of adding ten, then subtracting two. Minus 8 facts are similar, encourage students to think of taking ten, then adding two. The difference of 8 requires students to think of taking the ones from the teen number, then taking two more. Ten frames are excellent for explaining these facts.
