Single ten frame flash cards for laminating.

Print and cut in half, then laminate. Run through the cards with the students on a daily basis. "Flash" each card for a few seconds, until all students can instantly recall each number shown.

- At the start some students may need to count the dots. Encourage them to recognize each number without counting (subitize).
- Practice recognizing the numbers on the cards for a few minutes each day.
- Ask students to tell stories about the number.
- Once students have instant recognition of the ten frames in a horizontal orientation, we recommend that you rotate the cards vertically so that the students can become familiar with the alternative orientation. This will help to prepare students for the vertical arrangement used for numbers 11 to 20.
