

Multiplication Flash Cards

Square Numbers

Multiplication

Print and cut out the "Flash" cards within a second.

Flashcard

- Have students say each number fact as it is shown with the answer.
- There are individual students respond with the answer. Make it a speed test.
- Have two or three students race to be the first to respond with the correct answer.
- Have a student give a related division fact
- ◊ e.g. [5 x 5 = 25] related division fact: "25 ÷ 5 = 5"

- ◊ Older students may like to be challenged with associated squared fact such as $5^2 = 25$

Flashcards without answers:

- Have all students say each number fact as it is shown with the answer.
- Have individual students respond with the answer. Make it a speed test.
- Have two or three students race to be the first to respond with the correct answer.
- Have a student give a related division fact
- ◊ e.g. [5 x 5 = 25] related division fact: "25 ÷ 5 = 5"
- ◊ Older students may like to be challenged with associated $\sqrt{\quad}$ fact such as $\sqrt{25} = 5$
- Have students tell stories about the multiplication fact e.g. "Five children ate 5 jelly beans each. How many jelly beans altogether?" "A farmer planted eight rows of 8 bushes. How many bushes are planted altogether?" Encourage students to use sensible examples. Large numbers will need different stories. For example a child could not eat 12 hot dogs.
- For a challenge, ask questions like, "I am thinking of a number. If I divide 36 by this number the answer is the same number. What number is it?" or "I multiply 5 by itself, what number will I get?" or "What do I do to 36 to get 6?"
