within a sec...

Flashcard...

• Have a...

• There...

• Have a student give the related division fact

  ◊ e.g. [5 x 5 = 25] related division fact: "25 ÷ 5 = 5"

  ◊ Older students may like to be challenged with associated squared fact such as $5^2 = 25$

• Tell stories about the multiplication fact e.g. "Five children ate 5 jelly beans each. That is 25 jelly beans altogether." "A farmer planted eight rows of 8 bushes, that is 64 bushes altogether." Encourage students to use sensible examples. Large numbers will need different stories. For example a child could not eat 12 hot dogs.

Flashcards without answers:

• Have all students say each number fact as it is shown **with** the answer.

• Have individual students respond with the answer. Make it a speed test.

• Have two or three students race to be the first to respond with the correct answer.

• Have a student give a related division fact

  ◊ e.g. [5 x 5 = 25] related division fact: "25 ÷ 5 = 5"

  ◊ Older students may like to be challenged with associated √ fact such as √25 = 5

$$0^2 = 0$$
