This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 2: Addition & Subtraction Extended Worksheets". Once the previous recommended strategies have been learned, there are just two pairs of addition facts which remain: 7+4 and 7+5, and their turnaround facts. These facts can be learned as special cases, and students can be encouraged to think of related facts that help to memorize them. For example, 7+4 is just one more than the rainbow fact 7+3. A pair of ten frames can be used to illustrate 7+5, which will show that this sum is the same as double five plus two, or 12. The remainder of this worksheet includes revision of all strategies from previous worksheet sets.
