

Multiplication Flash Cards

Square Numbers

(Exponent notation)

Multiplication

Print and cut out each card for a set of flashcards.

Flashcards

- Have students read the multiplication fact and the related division fact.
- There are two versions of each flashcard. One with the answer and one without.
- Have students use the flashcards to practice multiplication and division facts.
 - ◊ e.g. [5 x 5 = 25] related division fact: "25 ÷ 5 = 5"
 - ◊ Older students may like to be challenged with associated squared fact such as 5² = 25
- Tell stories about the multiplication fact e.g. "Five children ate 5 jelly beans each. That is 25 jelly beans altogether." "A farmer planted eight rows of 8 bushes, that is 64 bushes altogether." Encourage students to use sensible examples. Large numbers will need different stories. For example a child could not eat 12 hot dogs.

Flashcards without answers:

- Have all students say each number fact as it is shown **with** the answer.
- Have individual students respond with the answer. Make it a speed test.
- Have two or three students race to be the first to respond with the correct answer.
- Have a student give a related division fact
 - ◊ e.g. [5 x 5 = 25] related division fact: "25 ÷ 5 = 5"
 - ◊ Older students may like to be challenged with associated $\sqrt{\quad}$ fact such as $\sqrt{25} = 5$

$$0^2 = 0$$
