

Addition Flash Cards

Doubles

(Letter size)

Addition

Print and cut out each card for a flashcard activity.

Flashcards

- Have students read the equation and say the answer.
- Note: The answer is written on the back of the card.
- Have students write the answer on the back of the card.
- ◊ e.g. “One child had 5 cupcakes. Another child had 5 cupcakes. How many cupcakes were there altogether?”

Flashcards without answers:

- Have all students say each number fact as it is shown, **adding** the answer.
- Have individual students respond with the answer. Make it a speed test .
- Have two or three students race to be the first to respond with the correct answer.
- Have a student give a related subtraction fact
 - ◊ e.g. [6 + 6 = 12] is 12 – 6 = 6
- Tell stories about the addition fact e.g. “One child had 5 cupcakes. Another child had 5 cupcakes. How many cupcakes were there altogether ?”
 - ◊ Use doubling examples e.g. “William has 6 marbles and Jeremy has the same number. How many have they altogether?” This is associating the multiplication fact with the addition fact.
 - ◊ “Alisha has 4 lollies and doubles them in number. How many does she have now?”

$$0 + 0 = 0$$
