

Reading and Writing Numbers to 99

EASY PLACE VALUE

This activity focuses on the use of the packets of gum to show numbers to 99.

Prerequisite: If you have not already introduced the numbers to 99 using Unifix cubes or other familiar resources, see *Reading and Writing Numbers 20-99 Unifix* first and *Reading and Writing Teen Numbers Unifix*. It is recommended that you follow those lesson plans before using this one.

Important Note: Gum is a familiar real grouping of objects that students may encounter in the real world. The Easy Place Value Gadget allows for this object to be grouped and ungrouped on-screen. This means that students can see, virtually, what happens with these packets as a group of ten is created. Animations allow for the packing and unpacking of the 10 gum pieces.

1. Revise reading and writing tens and ones with Unifix cubes, bundling sticks and place value

2. Show

t or
56, 57, 58,

- **Remind students:** *what happens when we get 10 ones?... the gum is packaged into 1 packet of ten, which moves to the Tens place.*
- **Ask:** *How many tens are there now? How many ones?*
- **Say:** *Write down the number shown now. Count or repeat with other numbers. Count backwards.*
- Watch the numbers change as the gum packets group and ungroup as you go.
- Have students complete the worksheets.

* See attached chart.

Listen to your teacher and write your answers here.
