Overview:

This versatile program is designed to help students to count fluently in any place in numbers up to millions including decimals to thousandths. The app will count forwards or backwards, in 1s, 2s or 5s starting at any number.
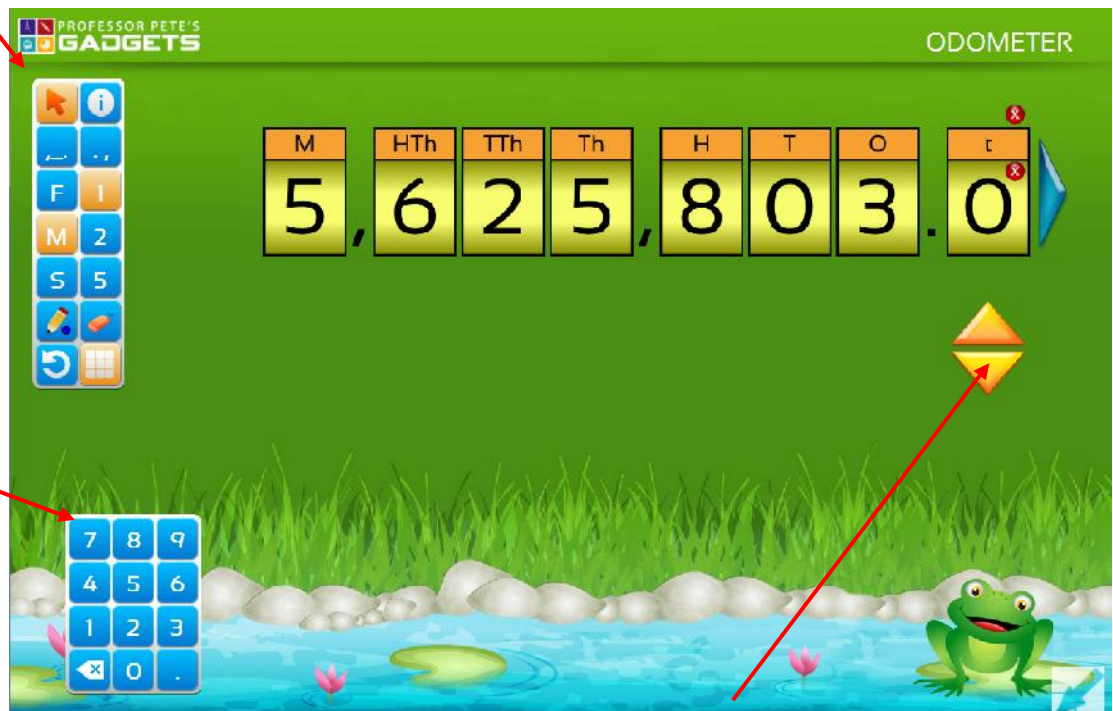

Students can count with the Odometer which shows the numbers as they increase or decrease.

Odometer shows numbers before and after in any place. E.g. 1000 before or 1000 after any given number.

Main Interface:

Toolbox: multiple tools allow for manipulation on screen

Keypad: for entering numbers to 9,999,999.999 from which to start counting

Counting arrow: Click up arrow to count forwards in that place.
Click the down arrow to count backwards.

Click cross: closes this place completely

Click cross: removes digit from this place but allows for place to remain open

Blue arrows: hover over the first or last digit and a blue arrow appears. Click arrow to open a new place to the right or left.
