

### Creating individual number slides

When using the number slide Gadget, it is generally beneficial for students to create their own number slides to use before using the *Number Slide Gadget*.

#### How to make your own number slide

- Choose between the whole numbers and the decimal slides.
- Print off the slide shown on the following page onto cardboard.
- Have the students cut out the slide and the holes for the digits of the number.
- Students will need strips of paper to slide inside the number slide. Cut a sheet of paper into 5 or 6 strips lengthways.
- These strips are inserted inside the slide.
- Use a paperclip to hold the strips in place.
- Directly above each digit place a strip of paper with the digit written on it.
- The number is then read from left to right.

in the  
mother.
