Scope and Sequence – Developing Number Fluency “Times Tables”

Developing Fluency Worksheets Series

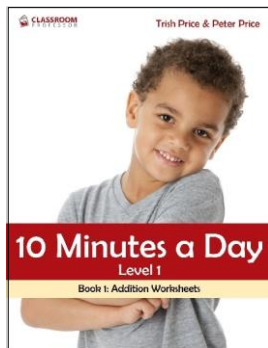

Grade 1 / Year 2

Four eBooks:

- Addition & Subtraction to 10
- Addition
- Subtraction
- Addition & Subtraction Revision

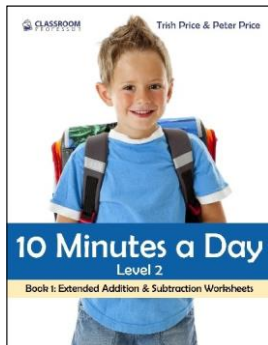

Grade 2 / Year 3

Four eBooks:

- Addition
- Subtraction
- Addition & Subtraction Revision
- Easy Multiplication & Division

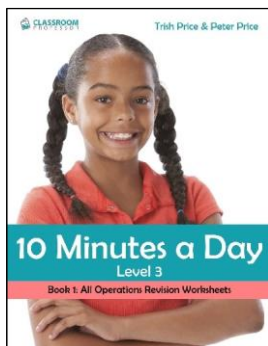

Grade 3 / Year 4

Four eBooks:

- Extended Addition & Subtraction
- Multiplication
- Division
- Multiplication & Division Revision

Grade 4 / Year 5

Four eBooks:

- All Operations Revision
- Extended Multiplication & Division
- Division with Remainders
- Factors & Multiples

Grade 5 / Year 6

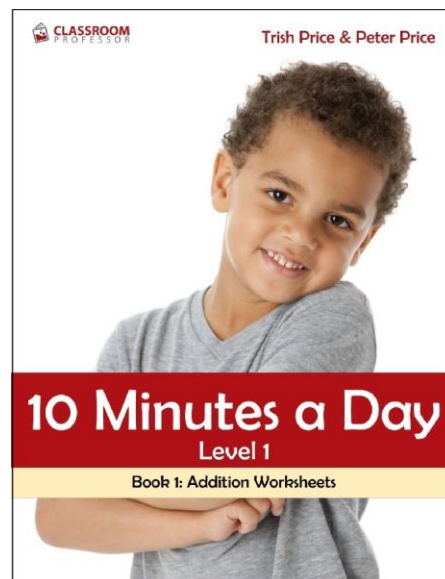

Four eBooks:

- Mental Strategies
- All Operations Advanced Revision
- Fractions
- Percentages

Grade 2 / Year 3 eBooks series: 10 Minutes a Day Level 1

Each worksheets eBook contains:

- * Daily worksheets for 10 weeks
- * Carefully graded and sequenced activities
- * Lots of revision activities
- * 5 Checkup worksheets for assessment
- * 20 Homework worksheets with parents' advice
- * All answer keys
- * PDF download for easy access
- * Teaching strategies advice
- * 30-day money-back guarantee

Addition:

- Count on 1
- Count on 2
- Count on 3
- Rainbow facts
- Special cases (+0, +10)
- Doubles
- Doubles +1
- Near 10 (+9)
- Near 10 (+8)
- Remaining facts (7+4, 7+5)
- Revision

Subtraction:

- Count back 1
- Count back 2
- Count back 3
- Rainbow facts
- Take away 0, 10
- Halving
- Double +1
- Near 10 (-9)
- Near 10 (-8)
- Remaining facts
- Revision

Addition & Subtraction Revision:

- Count on 1, 2 & 3
- Count back 1, 2 & 3
- Difference of 1, 2 & 3
- Rainbow facts
- Double/Halve
- Double +1
- Near Ten (+8, +9)
- Remaining facts
- Revision

Easy Multiplication & Division:

- Double (2x)
- Place value (5x, 10x)
- Double + one more set (3x)
- Halving ($\div 2$)
- Place value ($\div 10$)
- Relate to 5x ($\div 5$)
- Think of 3x ($\div 3$)
- X Revision- \div Revision
- All x \div Revision

Contents: Ten Minutes a Day Level 1: Subtraction

Classroom Worksheets

Count back 1, Difference of 1	1[A] - 1[D]

Teaching Strategies

Teaching Strategies Fact Sheets

The Teaching Strategies Fact Sheets provide expert information for teachers about the recommended strategy-based approach to the teaching of arithmetic facts.

Subtraction Number Facts - Teaching Strategies

– 1: *Count Back Facts*

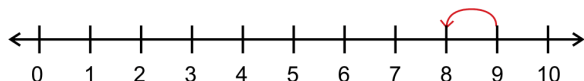

Subtract 1 facts are taught using a *count back one* strategy: Students who are familiar with the sequence of counting numbers backwards can mentally “count back” to the previous number, and name it.

A number line will help children to visualize this operation which lands on the previous number:

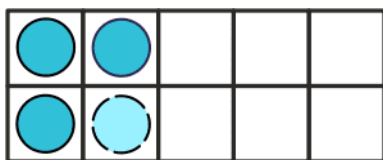

Also included are questions in which the *difference* is 1. As students become familiar with counting, they will know which numbers are next to each other, the difference between adjacent numbers being one.

For example, $9 - 8 = 1$, as it takes only 1 hop to move from 9 to 8:

Ten frames are also an excellent way for children to visualise the count back one strategy. With frequent use of ten frames, subtracting one is an easy step. For example:

$$4 - 1 = 3$$

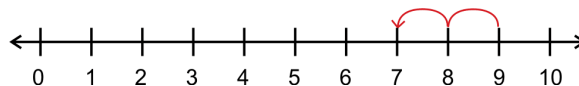

Daily practice from a young age makes visualisation of numbers up to 10 an automatic task.

– 2: *Count Back Facts*

Subtract 2 facts are taught using a *count back two* strategy: Students who are familiar with the sequence of counting numbers backwards can mentally “count back” two more numbers.

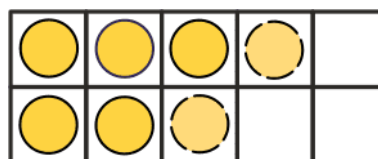

A number line will help children to visualize this operation, which “skips” one number and lands on the number two before the starting number. Also included are questions in which the difference is two. As students become familiar with counting, they will know which numbers are two away from each other, the difference being 2. These pairs will either both be odd or both be even numbers. For example:

$$9 - 2 = 7$$

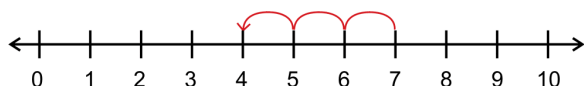

Ten frames will also help children to learn the numbers which are two apart. With frequent use of ten frames, subtracting two is an easy step: for example:

$$7 - 2 = 5$$

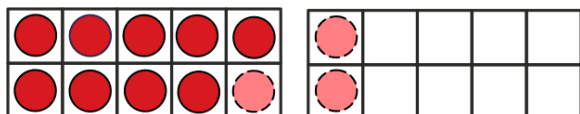

– 3: *Count Back Facts*

Subtract 3 facts are taught using a *count back three* strategy: Students who are familiar with the sequence of counting numbers backwards can mentally “count back” three more numbers. A number line will help children to visualize this operation which “skips” two numbers and lands on the number three before the starting number. Also included are questions in which the difference is 3. As students become familiar with counting, they will know which numbers are three away from each other, the difference being three.

With frequent use of ten frames, subtracting three is also quite simple: for example:

$$12 - 3 = 9$$

Note that counting is used only until students can recall these facts; the intention is not for counting to take the place of memorization.

Rainbow Facts

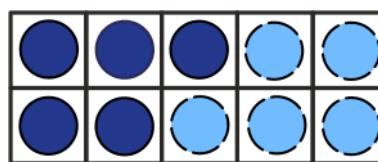

Rainbow subtraction facts are taught using a *subtract from ten* strategy: the number subtracted and the difference together equal ten.

Students can be shown a rainbow graphic to illustrate the fact that these pairs are equidistant from the number five. Rainbow

facts are foundational for many other mathematical skills, such as giving change.

Ten frames are excellent resources to support learning of rainbow facts, as the counters added clearly show the number remaining to add to ten. Students can either tell the number of blank spaces, or fill them with counters of a second color:

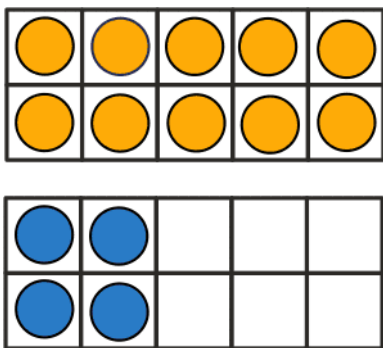

– 0 & – 10

Minus 0 and minus 10 facts are *special cases*.

The number zero is the “subtractive identity”, meaning that another number is unchanged by the action of subtracting zero. Talk to students about “removing” none from a group.

Subtracting ten from a teen number results in the associated single digit number which has the same number of ones; most pairs of a single digit number and the associated teen number sound similar (e.g., “fourteen” and “four”). This can be illustrated easily with a pair of ten frames:

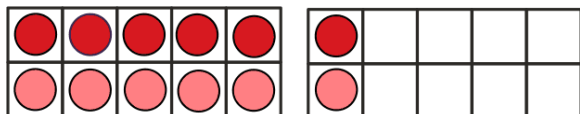

Doubles

Doubles subtraction number facts are taught using a *halving* strategy, connecting to everyday situations in which one half of a double is subtracted. For example, half a dozen eggs can be removed from a full dozen, illustrating “12 subtract half of 12”.

Ten frames will help students to visualize two halves of an even number. For example:

$$12 - 6 = 6$$

Doubles + 1

Doubles +1 subtraction number facts are taught using a *think of doubles plus one* strategy. Once double plus one addition facts are memorized, students can recall the associated numbers, and answer a subtraction fact. These are some of the most challenging subtraction facts, and for many students will require extra time to learn them.

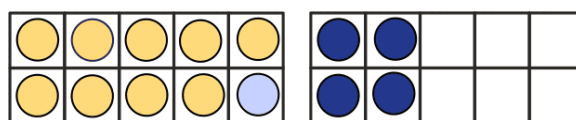

– 9

Minus nine number facts are taught using a *near ten* strategy: encourage students to think of subtracting ten, then adding one.

Ten frames illustrate this idea very effectively, and students should not have trouble understanding the idea for themselves. For example:

$$14 - 9 = 14 - 10 + 1 \\ = 5$$

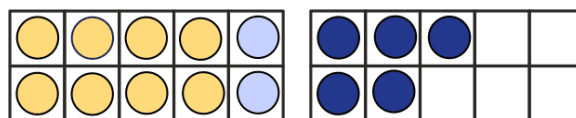

– 8

Minus eight number facts are taught using a *near ten* strategy: encourage students to think of subtracting ten, then adding two.

Ten frames illustrate this idea very effectively, and students should not have trouble understanding the idea for themselves.

Remaining facts

Once the previous recommended strategies have been learned, there are just two pairs of subtraction facts which remain:

$$11 - 4 = 7$$

$$11 - 7 = 4$$

$$12 - 5 = 7$$

$$12 - 7 = 5$$

These facts can be learned as special cases, and students can be encouraged to think of related facts that help to memorize them. For example, $11 - 4$ is just one more than the rainbow fact $10 - 4$.

The remainder of “Remaining Facts” worksheets include revision of all strategies from previous worksheet sets.

Check Up Tests Markbook

There are 4 or 5 Check Up Tests in this eBook. Enter students' scores and times below to keep track of their progress.

[illegible]

[illegible]

Standard Worksheets

Standard Worksheets

Standard Worksheets are designed for use by the majority of students in a regular class.

Suggested Uses:

1. Use one worksheet per day for four days a week, followed by a Check-Up sheet on the tenth day, once per two weeks. This program will take 10 weeks in total, after which the majority of students should know the arithmetic facts they have been practising.
2. Use a Checkup sheet to discover your students' strengths and weaknesses. Use a targeted approach to customize each student's program, providing each student with a selection of Standard Worksheets which match that student's needs.

Note: **Answer keys** for all worksheets are in the Answer Keys Section of this eBook.

Take One "Count Back" Strategy

Take 1: These facts are taught using a COUNT BACK strategy. A number line will help children to visualize this operation in which counting back 1 lands on the previous number.

"Difference of" Strategy

Difference of 1: As students become familiar with counting, they will know which numbers are next to each other, the difference being 1. For example, $9-8=1$ as it takes only 1 hop to move from 9 to 8. Discourage children from counting back 8 using their fingers or the number line.

Use the number line to help count back.
Do not use your fingers.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Subtract 1 facts are taught using a COUNT BACK strategy: Students who are familiar with the sequence of counting numbers backwards can mentally "count back" to the previous number, and name it. A number line will help children to visualize this operation which lands on the previous number. Also included here is the difference of 1. As students become familiar with counting, they will know which numbers are next to each other, the difference being 1. For example, $9-8=1$ as it takes only 1 hop to move from 9 to 8. Discourage children from counting back 8 using their fingers or the number line.

Take Two "Count Back" Strategy

Take 2: These facts are taught using a COUNT BACK strategy: Students who are familiar with the sequence of counting numbers backwards can mentally "count back" two more numbers. A number line should help them to visualize this strategy.

"Difference of" Strategy

Difference of 2: As students become familiar with counting, they will know which numbers are near to each other, the difference being 2. For example, $9-7=2$ as it takes only 2 hops to move from 9 to 7. Discourage children from counting back 7 using their fingers or the number line.

Use the number line to help count back.
Do not use your fingers.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Subtract 2 facts are taught using a COUNT BACK strategy: Students who are familiar with the sequence of counting numbers backwards can mentally "count back" two more numbers. A number line will help children to visualize this operation which "skips" one number and lands on the previous one. Also included here is the difference of 2. As students become familiar with counting, they will know which numbers are two away from each other, the difference being 2. These pairs will be both odd or both even numbers. In examples such as $8-6=2$, discourage children from counting back 6 using their fingers or the number line.

Take Three "Count Back" Strategy

Take 3: These facts are taught using a COUNT BACK strategy: Students who are familiar with the sequence of counting numbers backwards can mentally "count back" three more numbers. A number line should help them to visualize this strategy.

"Difference of" Strategy

Difference of 3: As students become familiar with counting, they will know which numbers are near to each other, the difference being 3. For example, $8-5=3$ as it takes only 3 hops to move from 8 to 5. Discourage children from counting back 5 using their fingers or the number line.

Use the number line to help count back.
Do not use your fingers.

Rainbow facts

Taking away from 10 involves knowing the addition Rainbow Facts. Familiarity with numbers to 10 shown on a ten frame will make these questions easy to students. Students can be shown a rainbow graphic to illustrate the fact that these pairs are equidistant from the number 5. Rainbow facts are foundational for many other mathematical skills, such as giving change.

Use a ten frame. Do not use your fingers.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Rainbow subtraction facts are taught using a SUBTRACT FROM TEN strategy: the number subtracted and the difference together equal 10. The rainbow graphic illustrates the fact that these pairs are equidistant from the number 5. Rainbow facts are foundational for many other mathematical skills, such as giving change.

Rainbow facts

Minus 0 and minus 10 facts are SPECIAL CASES. The number zero is the “subtractive identity”, meaning that another number is unchanged by the action of subtracting zero. Talk to students about “removing” none from a group. Subtracting ten from a teen number results in the associated single digit number which has the same number of ones (eg, “eighteen” and “eight”).

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Minus 0 and minus 10 facts are SPECIAL CASES. The number zero is the "subtractive identity", meaning that another number is unchanged by the action of subtracting zero. Talk to students about "removing" none from a group. Subtracting ten from a teen number results in the associated single digit number which has the same number of ones (eg, "eighteen" and "eight").

"Double/Halve" Strategy

Ensure that students have good recall of double addition facts before introducing the "Halve" strategy. Ten frames can be useful for showing half of the number. Do not let students count back the number.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Doubles subtraction number facts are taught using a HALVING strategy, connecting to everyday situations in which one half of a double is subtracted.

Relate to "Double +1" Strategy

Doubles +1 subtraction number facts are taught using a THINK OF DOUBLE PLUS ONE strategy: once double plus one addition facts are memorized, students can recall the associated numbers, and answer a subtraction fact.

For example, $13 - 6 = ?$ think: $12 - 6 = 6$ so $13 - 6$ equals one more 7. $13 - 6 = 7$

These are some of the most challenging subtraction facts, and will probably require extra time for students to learn them.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Doubles +1 subtraction number facts are taught using a THINK OF DOUBLE PLUS ONE strategy: once double plus one addition facts are memorized, students can recall the associated numbers, and answer a subtraction fact. These are some of the most challenging subtraction facts, and will probably require extra time for students to learn them.

Time:

Score:

Difference of 9, -9 Near Ten: 8 [A]

- 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 9 8 All

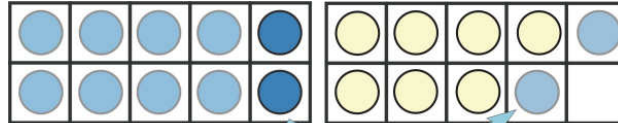

Nine is "Near 10" Strategy

Nine is near 10, so encourage students to think of subtracting ten then adding one back.

For example, $16 - 9 = ?$ think: $16 - 10 = 6$ so $16 - 9$ equals one more, so $16 - 9 = 7$

"Difference of" Strategy

Difference of 1: As students become familiar numbers, they will know which numbers are nearly ten apart. For example, $17 - 8 = 9$ as it takes away one less than the ten. Discourage children from counting back 8 using their fingers or a number line.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Minus 9 number facts are taught using a NEAR TEN strategy: encourage students to think of subtracting ten, then adding one. The difference of 9 requires students to think of taking the ones from the teen number, then taking one more. Ten frames are excellent for explaining these facts.

Score:

Difference of 8, -8 Near Ten: 9 [A]

- 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 9 8 All

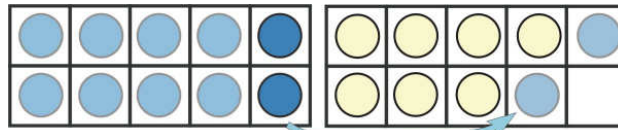

Eight is "Near 10" Strategy

Eight is near 10, so encourage students to think of subtracting ten then adding two back.
For example, $17 - 8 = ?$ think: $17 - 10 = 7$ so $17 - 8$ equals two more, so $17 - 8 = 9$

"Difference of" Strategy

Difference of 8: Take away the ones and two more.

For example, $14 - 6 = ?$ think: $14 - 4 = 10$ so $14 - 6$ means taking away two more. $14 - 6 = 8$

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Minus 8 number facts are taught using a NEAR TEN strategy: encourage students to think of taking ten, then adding two. The difference of 8 requires students to think of taking the ones from the teen number, then taking one more. Ten frames are excellent for explaining these facts.

Last Facts

Once the previous recommended strategies have been learned, there are just two pairs of subtraction facts which remain: 11-4, 11-7, 12-5 and 12-7. These facts can be learned as special cases, and students can be encouraged to think of related facts that help to memorize them. For example, 11-4 is just one more than the rainbow fact 10-4.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Once the previous recommended strategies have been learned, there are just two pairs of subtraction facts which remain: 11-4, 11-7, 12-5 and 12-7. These facts can be learned as special cases, and students can be encouraged to think of related facts that help to memorize them. For example, 11-4 is just one more than the rainbow fact 10-4.

Homework Sheets

Homework Sheets

Homework Sheets are designed to be sent home at regular intervals for home-based revision of arithmetic facts. Each sheet includes information for parents to briefly explain the learning strategy being adopted in the classroom, so that parents can offer help to their children that is consistent with what is taught at school.

Suggested Uses:

1. Use homework sheets for reinforcement of learning in class, by sending matching homework sheets home as each strategy is covered in class.
2. Introduce the program of developing fluency in arithmetic facts at a parent evening, open day, or parent-teacher interview, for example. Use the occasion to explain to parents the strategies being adopted in your classroom, and invite parents to assist their child to learn by following the Advice to Parents on each homework sheet.

Note: **Answer keys** for all worksheets are in the Answer Keys Section of this eBook.

Homework

Count Back 1, Difference of 1: 1 [A]

– 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 9 8 All

Information for Parents: "Count Back", "Difference of" Strategy

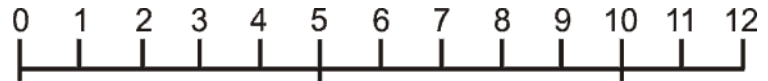

Take One "Count Back" Strategy

Take 1: These facts are taught using a COUNT BACK strategy. A number line will help children to visualize the operation in which counting back 1 lands on the previous number.

"Difference of" Strategy

Difference of 1: As students become familiar with counting, they will know which numbers are next to each other, the difference being 1. For example, $9-8=1$ as it takes only 1 hop to move from 9 to 8. Discourage children from counting back 8 using their fingers or the number line.

Use the number line to help count back.
Do not use your fingers.

Information for Parents: "Rainbow Facts"

Rainbow facts

Taking away from 10 involves knowing the addition Rainbow Facts. Familiarity with numbers to 10 shown on a ten frame will make these questions easy to students. Students can be shown a rainbow graphic to illustrate the fact that these pairs are equidistant from the number 5. Rainbow facts are foundational for many other mathematical skills, such as giving change.

Use a ten frame. Do not use your fingers.

Information for Parents: Special Cases

Special Cases

Minus 0 and minus 10 facts are SPECIAL CASES. The number zero is the “subtractive identity”, meaning that another number is unchanged by the action of subtracting zero. Talk to students about “removing” none from a group. Subtracting ten from a teen number results in the associated single digit number which has the same number of ones (eg, “eighteen” and “eight”).

Information for Parents: "Relate to Doubles +1" Strategy

Relate to "Double +1" Strategy

Doubles +1 subtraction number facts are taught using a THINK OF DOUBLE PLUS ONE strategy: once double plus one addition facts are memorized, students can recall the associated numbers, and answer a subtraction fact.

For example, $13 - 6 = ?$ think: $12 - 6 = 6$ so $13 - 6$ equals one more 7. $13 - 6 = 7$

These are some of the most challenging subtraction facts, and will probably require extra time for students to learn them.

Information for Parents: "Near 10", "Difference of 9" Strategy

Nine is "Near 10" Strategy

Nine is near 10, so encourage students to think of subtracting ten then adding one back.
For example, $16 - 9 = ?$ think: $16 - 10 = 6$ so $16 - 9$ equals one more, so $16 - 9 = 7$

"Difference of" Strategy

Difference of 1: As students become familiar numbers, they will know which numbers are nearly ten apart.
For example, $17 - 8 = 9$ as it takes away one less than the ten. Discourage children from counting back 8 using their fingers or a number line.

Information for Parents: "Near 10", "Difference of 9" Strategy

Eight is "Near 10" Strategy

Eight is near 10, so encourage students to think of subtracting ten then adding two back.
For example, $17 - 8 = ?$ think: $17 - 10 = 7$ so $17 - 8$ equals two more, so $17 - 8 = 9$

"Difference of" Strategy

Difference of 8: Take away the ones and two more.
For example, $14 - 6 = ?$ think: $14 - 4 = 10$ so $14 - 6$ means taking away two more. $14 - 6 = 8$

Information for Parents: Last Facts and Revision

Last Facts

Once the previous recommended strategies have been learned, there are just two pairs of subtraction facts which remain: 11-4, 11-7, 12-5 and 12-7. These facts can be learned as special cases, and students can be encouraged to think of related facts that help to memorize them. For example, 11-4 is just one more than the rainbow fact 10-4.

Answer Keys

Answer Keys

Answer Keys are provided for all worksheets in this eBook. Each Answer Key is identified by the title in the header of the page, which is identical to the relevant worksheet.

Suggested Uses:

1. Put the complete set of answer keys in a folder for students to take when marking their own work.
2. Display the relevant answer key on a data projector, with or without an interactive whiteboard, to display the answers to students as they mark each other's responses.

Take One "Count Back" Strategy

Take 1: These facts are taught using a COUNT BACK strategy. A number line will help children to visualize the operation in which counting back 1 lands on the previous number.

"Difference of" Strategy

Difference of 1: As students become familiar with counting, they will know which numbers are next to each other, the difference being 1. For example, $9-8=1$ as it takes only 1 hop to move from 9 to 8. Discourage children from counting back 8 using their fingers or the number line.

Use the number line to help count back.
Do not use your fingers.

**Count back 1**

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Subtract 1 facts are taught using a COUNT BACK strategy: Students who are familiar with the sequence of counting numbers backwards can mentally "count back" to the previous number, and name it. A number line will help children to visualize this operation which lands on the previous number. Also included here is the difference of 1. As students become familiar with counting, they will know which numbers are next to each other, the difference being 1. For example, $9-8=1$ as it takes only 1 hop to move from 9 to 8. Discourage children from counting back 8 using their fingers or the number line.

Take Two "Count Back" Strategy

Take 2: These facts are taught using a COUNT BACK strategy: Students who are familiar with the sequence of counting numbers backwards can mentally "count back" two more numbers. A number line should help them to visualize this strategy.

"Difference of" Strategy

Difference of 2: As students become familiar with counting, they will know which numbers are near to each other, the difference being 2. For example, $9-7=2$ as it takes only 2 hops to move from 9 to 7. Discourage children from counting back 7 using their fingers or the number line.

Use the number line to help count back.
Do not use your fingers.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets".

The recommended teaching sequence is shown in the bar at the top of this sheet. Subtract 3 facts are taught using a COUNT BACK strategy: Students who are familiar with the sequence of counting numbers backwards can mentally "count back" three more numbers. A number line will help children to visualize this operation which "skips" two numbers and lands on the previous one. Also included here is the difference of 3. As students become familiar with counting, they will know which numbers are two away from each other, the difference being 3. In examples such as $8-5=3$, discourage the children from counting back 5 the using their fingers or the number line.

Rainbow facts

Taking away from 10 involves knowing the addition Rainbow Facts. Familiarity with numbers to 10 shown on a ten frame will make these questions easy to students. Students can be shown a rainbow graphic to illustrate the fact that these pairs are equidistant from the number 5. Rainbow facts are foundational for many other mathematical skills, such as giving change.

Use a ten frame. Do not use your fingers.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Rainbow subtraction facts are taught using a SUBTRACT FROM TEN strategy: the number subtracted and the difference together equal 10. The rainbow graphic illustrates the fact that these pairs are equidistant from the number 5. Rainbow facts are foundational for many other mathematical skills, such as giving change.

Homework

Special Cases (−0 & −10): 5 [A]

– 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 9 8 All

Rainbow facts

Minus 0 and minus 10 facts are SPECIAL CASES. The number zero is the “subtractive identity”, meaning that another number is unchanged by the action of subtracting zero. Talk to students about “removing” none from a group. Subtracting ten from a teen number results in the associated single digit number which has the same number of ones (eg, “eighteen” and “eight”).

Take 0

- | | |
|----------------|-----------------|
| 1) $0 - 0 = 0$ | 6) $1 - 0 = 1$ |
| 2) $5 - 0 = 5$ | 7) $3 - 0 = 3$ |
| 3) $4 - 0 = 4$ | 8) $6 - 0 = 6$ |
| 4) $2 - 0 = 2$ | 9) $9 - 0 = 9$ |
| 5) $8 - 0 = 8$ | 10) $7 - 0 = 7$ |

Subtraction rainbow facts

- | | |
|-------------------|-------------------|
| 11) $10 - 7 = 3$ | 16) $10 - 10 = 0$ |
| 12) $10 - 3 = 7$ | 17) $10 - 8 = 2$ |
| 13) $10 - 0 = 10$ | 18) $10 - 1 = 9$ |
| 14) $10 - 6 = 4$ | 19) $10 - 4 = 6$ |
| 15) $10 - 2 = 8$ | 20) $10 - 9 = 1$ |

Addition revision

- | | |
|-------------------|-------------------|
| 51) $8 + 10 = 18$ | 59) $8 + 3 = 11$ |
| 52) $7 + 5 = 12$ | 60) $7 + 4 = 11$ |
| 53) $4 + 6 = 10$ | 61) $9 + 6 = 15$ |
| 54) $7 + 7 = 14$ | 62) $6 + 8 = 14$ |
| 55) $6 + 4 = 10$ | 63) $6 + 6 = 12$ |
| 56) $5 + 4 = 9$ | 64) $9 + 10 = 19$ |
| 57) $3 + 7 = 10$ | 65) $5 + 6 = 11$ |
| 58) $4 + 3 = 7$ | 66) $4 + 4 = 8$ |

Take 10

- | | |
|-------------------|-------------------|
| 21) $13 - 10 = 3$ | 26) $10 - 10 = 0$ |
| 22) $14 - 10 = 4$ | 27) $17 - 10 = 7$ |
| 23) $19 - 10 = 9$ | 28) $11 - 10 = 1$ |
| 24) $15 - 10 = 5$ | 29) $18 - 10 = 8$ |
| 25) $12 - 10 = 2$ | 30) $16 - 10 = 6$ |

Difference of 0 and 10

- | | |
|--------------------|-------------------|
| 31) $8 - 8 = 0$ | 41) $19 - 9 = 10$ |
| 32) $18 - 8 = 10$ | 42) $5 - 5 = 0$ |

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Minus 0 and minus 10 facts are SPECIAL CASES. The number zero is the "subtractive identity", meaning that another number is unchanged by the action of subtracting zero. Talk to students about "removing" none from a group. Subtracting ten from a teen number results in the associated single digit number which has the same number of ones (eg, "eighteen" and "eight").

"Double/Halve" Strategy

Ensure that students have good recall of double addition facts before introducing the "Halve" strategy. Ten frames can be useful for showing half of the number. Do not let students count back the number.

Doubles

- | | |
|-----------------|-------------------|
| 1) $7 + 7 = 14$ | 6) $8 + 8 = 16$ |
| 2) $4 + 4 = 8$ | 7) $3 + 3 = 6$ |
| 3) $1 + 1 = 2$ | 8) $6 + 6 = 12$ |
| 4) $5 + 5 = 10$ | 9) $10 + 10 = 20$ |
| 5) $2 + 2 = 4$ | 10) $9 + 9 = 18$ |

Halving

- | | |
|------------------|--------------------|
| 11) $2 - 1 = 1$ | 21) $4 - 2 = 2$ |
| 12) $16 - 8 = 8$ | 22) $16 - 8 = 8$ |
| 13) $18 - 9 = 9$ | 23) $18 - 9 = 9$ |
| 14) $10 - 5 = 5$ | 24) $20 - 10 = 10$ |
| 15) $4 - 2 = 2$ | 25) $2 - 1 = 1$ |
| 16) $6 - 3 = 3$ | 26) $12 - 6 = 6$ |
| 17) $8 - 4 = 4$ | 27) $20 - 10 = 10$ |

Relate to "Double +1" Strategy

Doubles +1 subtraction number facts are taught using a THINK OF DOUBLE PLUS ONE strategy: once double plus one addition facts are memorized, students can recall the associated numbers, and answer a subtraction fact.

For example, $13 - 6 = ?$ think: $12 - 6 = 6$ so $13 - 6$ equals one more 7. $13 - 6 = 7$

These are some of the most challenging subtraction facts, and will probably require extra time for students to learn them.

Doubles +1 addition revision

1) $8 + \underline{9} = 17$

3) $\underline{5} + 4 = 9$

5) $7 + 8 = \underline{15}$

7) $4 + 5 = \underline{9}$

2) $6 + 7 = \underline{13}$

4) $4 + 3 = \underline{7}$

6) $7 + \underline{6} = 13$

8) $6 + \underline{5} = 11$

Related to double +1

9) $10 - 5 = \underline{5}$

29) $14 - 7 = \underline{7}$

10) $11 - 5 = \underline{6}$

30) $15 - 7 = \underline{8}$

11) $8 - 4 = \underline{4}$

31) $10 - 5 = \underline{5}$

12) $9 - 4 = \underline{5}$

32) $11 - 5 = \underline{6}$

13) $14 - 7 = \underline{7}$

33) $18 - 9 = \underline{9}$

14) $15 - 7 = \underline{8}$

34) $19 - 9 = \underline{10}$

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Doubles +1 subtraction number facts are taught using a THINK OF DOUBLE PLUS ONE strategy: once double plus one addition facts are memorized, students can recall the associated numbers, and answer a subtraction fact. These are some of the most challenging subtraction facts, and will probably require extra time for students to learn them.

Difference of 9, -9 Near Ten: 8 [A]

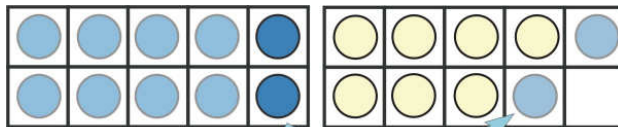

- 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 **9** 8 All

Nine is "Near 10" Strategy

Nine is near 10, so encourage students to think of subtracting ten then adding one back.
For example, $16 - 9 = ?$ think: $16 - 10 = 6$ so $16 - 9$ equals one more, so $16 - 9 = 7$

"Difference of" Strategy

Difference of 1: As students become familiar numbers, they will know which numbers are nearly ten apart.
For example, $17 - 8 = 9$ as it takes away one less than the ten. Discourage children from counting back 8 using their fingers or a number line.

-9 (near 10)

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Minus 9 number facts are taught using a NEAR TEN strategy: encourage students to think of subtracting ten, then adding one. The difference of 9 requires students to think of taking the ones from the teen number, then taking one more. Ten frames are excellent for explaining these facts.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Minus 9 number facts are taught using a NEAR TEN strategy: encourage students to think of subtracting ten, then adding one. The difference of 9 requires students to think of taking the ones from the teen number, then taking one more.

Difference of 8, -8 Near Ten: 9 [A]

– 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 9 **8** All

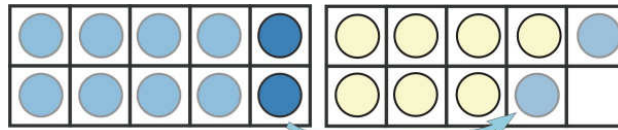

Eight is "Near 10" Strategy

Eight is near 10, so encourage students to think of subtracting ten then adding two back.
For example, $17 - 8 = ?$ think: $17 - 10 = 7$ so $17 - 8$ equals two more, so $17 - 8 = 9$

"Difference of" Strategy

Difference of 8: Take away the ones and two more.

For example, $14 - 6 = ?$ think: $14 - 4 = 10$ so $14 - 6$ means taking away two more. $14 - 6 = 8$

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Minus 8 number facts are taught using a NEAR TEN strategy: encourage students to think of taking ten, then adding two. The difference of 8 requires students to think of taking the ones from the teen number, then taking one more. Ten frames are excellent for explaining these facts.

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Minus 8 number facts are taught using a NEAR TEN strategy: encourage students to think of taking ten, then adding two. The difference of 8 requires students to think of taking the ones from the teen number, then taking one more.

Last Facts

Once the previous recommended strategies have been learned, there are just two pairs of subtraction facts which remain: 11-4, 11-7, 12-5 and 12-7. These facts can be learned as special cases, and students can be encouraged to think of related facts that help to memorize them. For example, 11-4 is just one more than the rainbow fact 10-4.

Remaining facts (4+7) (5+7)

- | | |
|------------------|------------------|
| 1) $11 - 4 = 7$ | 11) $12 - 7 = 5$ |
| 2) $12 - 5 = 7$ | 12) $11 - 7 = 4$ |
| 3) $12 - 5 = 7$ | 13) $12 - 7 = 5$ |
| 4) $11 - 7 = 4$ | 14) $11 - 4 = 7$ |
| 5) $12 - 5 = 7$ | 15) $12 - 5 = 7$ |
| 6) $11 - 7 = 4$ | 16) $11 - 7 = 4$ |
| 7) $11 - 4 = 7$ | 17) $11 - 4 = 7$ |
| 8) $12 - 5 = 7$ | 18) $11 - 4 = 7$ |
| 9) $11 - 7 = 4$ | 19) $12 - 7 = 5$ |
| 10) $12 - 7 = 5$ | 20) $12 - 7 = 5$ |

Missing number revision

- | | |

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets". The recommended teaching sequence is shown in the bar at the top of this sheet. Once the previous recommended strategies have been learned, there are just two pairs of subtraction facts which remain: 11-4, 11-7, 12-5 and 12-7. These facts can be learned as special cases, and students can be encouraged to think of related facts that help to memorize them. For example, 11-4 is just one more than the rainbow fact 10-4.

Homework

Count Back 1, Difference of 1: 1 [A]

– 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 9 8 All

Information for Parents: "Count Back", "Difference of" Strategy

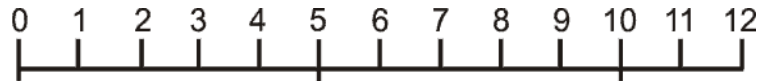

Take One "Count Back" Strategy

Take 1: These facts are taught using a COUNT BACK strategy. A number line will help children to visualize the operation in which counting back 1 lands on the previous number.

"Difference of" Strategy

Difference of 1: As students become familiar with counting, they will know which numbers are next to each other, the difference being 1. For example, $9-8=1$ as it takes only 1 hop to move from 9 to 8. Discourage children from counting back 8 using their fingers or the number line.

Use the number line to help count back.
Do not use your fingers.

Count Back 2, Difference of 2: 2 [A]

– 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 9 8 All

Information for Parents: "Count Back", "Difference of" Strategy

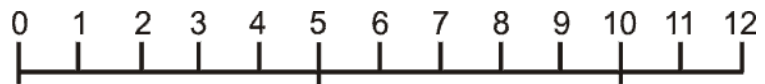

Take Two "Count Back" Strategy

Take 2: These facts are taught using a COUNT BACK strategy: Students who are familiar with the sequence of counting numbers backwards can mentally "count back" two more numbers. A number line should help them to visualize this strategy.

"Difference of" Strategy

Difference of 2: As students become familiar with counting, they will know which numbers are near to each other, the difference being 2. For example, $9 - 7 = 2$ as it takes only 2 hops to move from 9 to 7. Discourage children from counting back 7 using their fingers or the number line.

Use the number line to help count back.
Do not use your fingers.

Rainbow Facts: 4 [A]

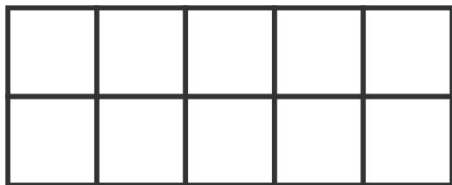

– 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 9 8 All

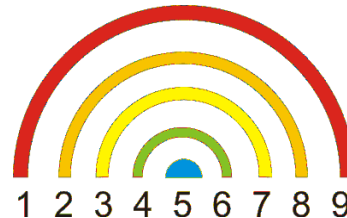

Information for Parents: "Rainbow Facts"

Rainbow facts

Taking away from 10 involves knowing the addition Rainbow Facts. Familiarity with numbers to 10 shown on a ten frame will make these questions easy to students. Students can be shown a rainbow graphic to illustrate the fact that these pairs are equidistant from the number 5. Rainbow facts are foundational for many other mathematical skills, such as giving change.

Use a ten frame. Do not use your fingers.

Information for Parents: Special Cases

Special Cases

Minus 0 and minus 10 facts are SPECIAL CASES. The number zero is the “subtractive identity”, meaning that another number is unchanged by the action of subtracting zero. Talk to students about “removing” none from a group. Subtracting ten from a teen number results in the associated single digit number which has the same number of ones (eg, “eighteen” and “eight”).

Take 0

- | | |
|----------------|-----------------|
| 1) $2 - 0 = 2$ | 6) $4 - 0 = 4$ |
| 2) $3 - 0 = 3$ | 7) $6 - 0 = 6$ |
| 3) $7 - 0 = 7$ | 8) $8 - 0 = 8$ |
| 4) $5 - 0 = 5$ | 9) $9 - 0 = 9$ |
| 5) $1 - 0 = 1$ | 10) $0 - 0 = 0$ |

Information for Parents: "Double/ Halve" Strategy

"Double/Halve" Strategy

Ensure that students have good recall of double addition facts before introducing the "Halve" strategy. Ten frames can be useful for showing half of the number. Do not let students count back the number.

Doubles

- | | |
|-----------------|-------------------|
| 1) $7 + 7 = 14$ | 6) $8 + 8 = 16$ |
| 2) $4 + 4 = 8$ | 7) $3 + 3 = 6$ |
| 3) $1 + 1 = 2$ | 8) $6 + 6 = 12$ |
| 4) $5 + 5 = 10$ | 9) $10 + 10 = 20$ |
| 5) $2 + 2 = 4$ | 10) $9 + 9 = 18$ |

Halving

- | | |
|------------------|--------------------|
| 11) $2 - 1 = 1$ | 21) $4 - 2 = 2$ |
| 12) $16 - 8 = 8$ | 22) $16 - 8 = 8$ |
| 13) $18 - 9 = 9$ | 23) $18 - 9 = 9$ |
| 14) $10 - 5 = 5$ | 24) $20 - 10 = 10$ |
| 15) $4 - 2 = 2$ | 25) $2 - 1 = 1$ |
| 16) $6 - 3 = 3$ | 26) $12 - 6 = 6$ |
| 17) $8 - 4 = 4$ | 27) $20 - 10 = 10$ |
| 18) $12 - 6 = 6$ | 28) $14 - 7 = 7$ |

– 1 2 3 Rnbw 0&10 Dble/Hlv **Dble+1** 9 8 All

Information for Parents: "Relate to Doubles +1" Strategy

Relate to "Double +1" Strategy

Doubles +1 subtraction number facts are taught using a THINK OF DOUBLE PLUS ONE strategy: once double plus one addition facts are memorized, students can recall the associated numbers, and answer a subtraction fact.

For example, $13 - 6 = ?$ think: $12 - 6 = 6$ so $13 - 6$ equals one more 7. $13 - 6 = 7$

These are some of the most challenging subtraction facts, and will probably require extra time for students to learn them.

Homework

Difference of 9, -9 Near Ten: 8 [A]

 - 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 9 8 All

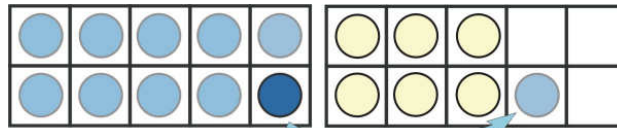

Information for Parents: "Near 10", "Difference of 9" Strategy

Nine is "Near 10" Strategy

Nine is near 10, so encourage students to think of subtracting ten then adding one back.
For example, $16 - 9 = ?$ think: $16 - 10 = 6$ so $16 - 9$ equals one more, so $16 - 9 = 7$

"Difference of" Strategy

Difference of 1: As students become familiar numbers, they will know which numbers are nearly ten apart.
For example, $17 - 8 = 9$ as it takes away one less than the ten. Discourage children from counting back 8 using their fingers or a number line.

**-9 (near 10)**

Homework

Difference of 8, -8 Near Ten: 9 [A]

 - 1 2 3 Rnbw 0&10 Dble/Hlv Dble+1 9 **8** All

Information for Parents: "Near 10", "Difference of 9" Strategy

Eight is "Near 10" Strategy

 Eight is near 10, so encourage students to think of subtracting ten then adding two back.
 For example, $17 - 8 = ?$ think: $17 - 10 = 7$ so $17 - 8$ equals two more, so $17 - 8 = 9$
"Difference of" Strategy

Difference of 8: Take away the ones and two more.

 For example, $14 - 6 = ?$ think: $14 - 4 = 10$ so $14 - 6$ means taking away two more. $14 - 6 = 8$

-8 (near 10)

- | | |
|-------------------|-------------------|
| 1) $16 - 10 = 6$ | 20) $13 - 10 = 3$ |
| 2) $16 - 8 = 8$ | 21) $13 - 8 = 5$ |
| 3) $12 - 10 = 2$ | 22) $15 - 0 = 15$ |
| 4) $12 - 8 = 4$ | 23) $15 - 8 = 7$ |
| 5) $13 - 10 = 3$ | 24) $17 - 10 = 7$ |
| 6) $13 - 8 = 5$ | 25) $17 - 8 = 9$ |
| 7) $15 - 10 = 5$ | 26) $14 - 10 = 4$ |
| 8) $15 - 8 = 7$ | 27) $14 - 8 = 6$ |
| 9) $17 - 10 = 7$ | 28) $11 - 10 = 1$ |
| 10) $17 - 8 = 9$ | 29) $11 - 8 = 3$ |
| 11) $14 - 10 = 4$ | 30) $9 - 8 = 1$ |
| 12) $14 - 8 = 6$ | 31) $13 - 8 = 5$ |
| 13) $11 - 10 = 1$ | 32) $14 - 8 = 6$ |
| 14) $11 - 8 = 3$ | 33) $13 - 8 = 5$ |
| 15) $15 - 8 = 7$ | 34) $9 - 8 = 1$ |
| 16) $13 - 8 = 5$ | 35) $15 - 8 = 7$ |
| 17) $14 - 8 = 6$ | 36) $9 - 8 = 1$ |
| 18) $14 - 8 = 6$ | 37) $16 - 8 = 8$ |
| 19) $13 - 8 = 5$ | 38) $17 - 8 = 9$ |

Difference of 10, difference of 8

- | | |
|-------------------|-------------------|
| 39) $15 - 5 = 10$ | 49) $12 - 2 = 10$ |
| 40) $15 - 7 = 8$ | 50) $12 - 8 = 4$ |
| 41) $17 - 7 = 10$ | 51) $11 - 3 = 8$ |
| 42) $17 - 9 = 8$ | 52) $14 - 6 = 8$ |
| 43) $14 - 4 = 10$ | 53) $10 - 8 = 2$ |
| 44) $14 - 6 = 8$ | 54) $8 - 0 = 8$ |
| 45) $13 - 3 = 10$ | 55) $13 - 5 = 8$ |
| 46) $13 - 5 = 8$ | 56) $14 - 6 = 8$ |
| 47) $16 - 6 = 10$ | 57) $12 - 8 = 4$ |
| 48) $16 - 8 = 8$ | 58) $13 - 5 = 8$ |

Difference of 8, -8

- | | |
|------------------|-------------------|
| 59) $13 - 8 = 5$ | 68) $16 - 8 = 8$ |
| 60) $11 - 3 = 8$ | 69) $14 - 6 = 8$ |
| 61) $9 - 8 = 1$ | 70) $12 - 8 = 4$ |
| 62) $17 - 8 = 9$ | 71) $8 - 8 = 0$ |
| 63) $15 - 8 = 7$ | 72) $18 - 8 = 10$ |
| 64) $10 - 2 = 8$ | 73) $12 - 8 = 4$ |
| 65) $8 - 8 = 0$ | 74) $10 - 8 = 2$ |
| 66) $11 - 8 = 3$ | 75) $14 - 8 = 6$ |
| 67) $12 - 8 = 4$ | 76) $9 - 8 = 1$ |

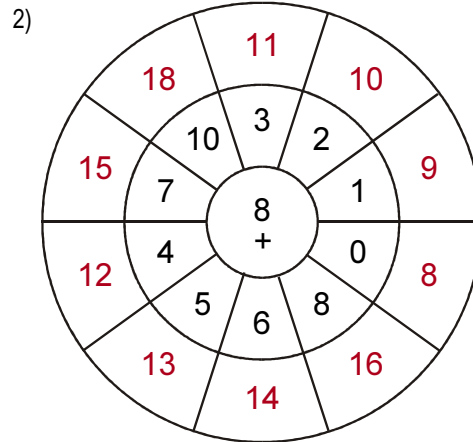

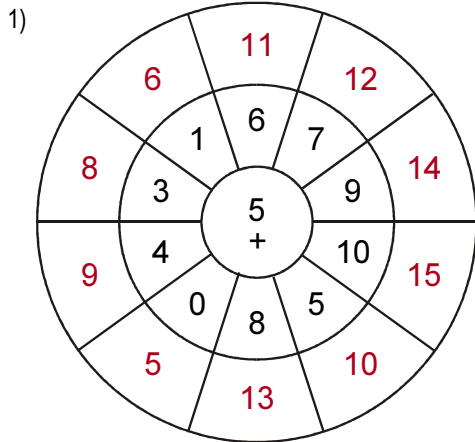

This worksheet is part of the Professor Pete's Classroom eBook "Ten Minutes a Day 1: Subtraction Worksheets".

Information for Parents: Last Facts and Revision

Last Facts

Once the previous recommended strategies have been learned, there are just two pairs of subtraction facts which remain: 11-4, 11-7, 12-5 and 12-7. These facts can be learned as special cases, and students can be encouraged to think of related facts that help to memorize them. For example, 11-4 is just one more than the rainbow fact 10-4.

Remaining facts (4+7) (5+7)

- | | |
|------------------|------------------|
| 1) $12 - 7 = 5$ | 11) $12 - 7 = 5$ |
| 2) $12 - 7 = 5$ | 12) $11 - 7 = 4$ |
| 3) $12 - 5 = 7$ | 13) $12 - 5 = 7$ |
| 4) $12 - 5 = 7$ | 14) $12 - 5 = 7$ |
| 5) $11 - 4 = 7$ | 15) $11 - 7 = 4$ |
| 6) $11 - 4 = 7$ | 16) $11 - 7 = 4$ |
| 7) $12 - 5 = 7$ | 17) $11 - 7 = 4$ |
| 8) $11 - 4 = 7$ | 18) $12 - 7 = 5$ |
| 9) $11 - 7 = 4$ | 19) $12 - 7 = 5$ |
| 10) $11 - 4 = 7$ | 20) $11 - 4 = 7$ |

Missing number revision

- | | |
|------------------------------|-------------------------------|
| 21) $\underline{9} + 9 = 18$ | 31) $6 + \underline{2} = 8$ |
| 22) $8 + 9 = \underline{17}$ | 32) $\underline{4} + 7 = 11$ |
| 23) $\underline{4} + 4 = 8$ | 33) $7 + 7 = \underline{14}$ |
| 24) $7 + \underline{4} = 11$ | 34) $7 + 8 = \underline{15}$ |
| 25) $8 + \underline{3} = 11$ | 35) $4 + 5 = \underline{9}$ |
| 26) $3 + \underline{9} = 12$ | 36) $\underline{8} + 2 = 10$ |
| 27) $\underline{6} + 7 = 13$ | 37) $7 + \underline{10} = 17$ |
| 28) $9 + 8 = \underline{17}$ | 38) $6 + 6 = \underline{12}$ |
| 29) $\underline{7} + 3 = 10$ | 39) $8 + \underline{7} = 15$ |
| 30) $5 + 2 = \underline{7}$ | 40) $5 + 6 = \underline{11}$ |

Subtraction revision

- | | |
|------------------------------|------------------------------|
| 41) $5 - 3 = \underline{2}$ | 56) $5 - 2 = \underline{3}$ |
| 42) $11 - 5 = \underline{6}$ | 57) $10 - 8 = \underline{2}$ |
| 43) $16 - 8 = \underline{8}$ | 58) $16 - 7 = \underline{9}$ |
| 44) $14 - 6 = \underline{8}$ | 59) $14 - 8 = \underline{6}$ |
| 45) $16 - 9 = \underline{7}$ | 60) $7 - 3 = \underline{4}$ |
| 46) $18 - 9 = \underline{9}$ | 61) $15 - 8 = \underline{7}$ |
| 47) $8 - 2 = \underline{6}$ | 62) $10 - 5 = \underline{5}$ |
| 48) $11 - 4 = \underline{7}$ | 63) $6 - 3 = \underline{3}$ |
| 49) $17 - 9 = \underline{8}$ | 64) $10 - 6 = \underline{4}$ |
| 50) $9 - 7 = \underline{2}$ | 65) $13 - 4 = \underline{9}$ |
| 51) $14 - 7 = \underline{7}$ | 66) $11 - 8 = \underline{3}$ |
| 52) $8 - 6 = \underline{2}$ | 67) $13 - 7 = \underline{6}$ |
| 53) $9 - 1 = \underline{8}$ | 68) $7 - 4 = \underline{3}$ |
| 54) $12 - 4 = \underline{8}$ | 69) $8 - 5 = \underline{3}$ |
| 55) $10 - 3 = \underline{7}$ | 70) $4 - 2 = \underline{2}$ |

Addition revision

- | | |
|-------------------------------|-------------------------------|
| 71) $3 + 3 = \underline{6}$ | 76) $6 + 8 = \underline{14}$ |
| 72) $3 + 6 = \underline{9}$ | 77) $3 + 2 = \underline{5}$ |
| 73) $9 + 3 = \underline{12}$ | 78) $10 + 5 = \underline{15}$ |
| 74) $10 + 4 = \underline{14}$ | 79) $6 + 10 = \underline{16}$ |
| 75) $3 + 8 = \underline{11}$ | 80) $3 + 0 = \underline{3}$ |
